

FERNANDO IBARRA

Hermosillo, Sonora, México • (662) 291-4052 • fernandooibarra@gmail.com

Languages - Spanish: Native - English: Basic Professional Proficiency

Professional Summary

Senior Backend / Full Stack Developer with 4+ years of hands-on experience building web and mobile applications using JavaScript, TypeScript, Node.js, NestJS, React, Next.js, and React Native. Recent experience as a Senior Backend Developer at Rocket Code, working on enterprise backend systems, microservice-based architectures, and the integration of modern services with legacy systems. Experienced in REST APIs, payment processing, asynchronous communication, messaging systems, databases, and Docker-based environments. Strong background in scalable backend solutions, complex problem solving, and modern frontend development.

Technical Skills

- **Frontend:** React.js, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS, Shadcn/UI, Bootstrap, CSS, SASS, Zustand, TanStack Query, React Router, Formik, React Hook Form
- **Backend:** Node.js, NestJS, Express.js, REST APIs, Microservices, WebSockets
- **Architecture & Messaging:** Microservices Architecture, RabbitMQ, Redis, asynchronous communication, service-to-service communication
- **Databases:** PostgreSQL, MongoDB, Prisma, TypeORM
- **DevOps & Tools:** Docker, Git, GitHub, NPM, PNPM, deployment and server configuration

Integrations: Payment Systems, Legacy Systems, Third-Party APIs, OpenAI API, Firebase

Rocket Code

Senior Backend Developer

Nov 2025 – Present | Hermosillo, Sonora, Mexico (Remote)

- Develop and maintain backend services using Node.js, TypeScript, and NestJS
- Design and evolve microservice-based architectures, separating business domains and responsibilities to improve scalability and maintainability
- Implement communication between microservices using RabbitMQ, supporting messaging and asynchronous processing
- Use Redis for temporary data management, communication, and backend process optimization
- Develop and integrate services related to payment processing, connecting new microservices with existing backend systems
- Analyze existing business logic in legacy systems to ensure new implementations preserve established functional behavior
- Develop APIs and backend services that integrate multiple modules and systems within a distributed architecture
- Work with PostgreSQL, Prisma, and TypeORM for data persistence and database management
- Containerize backend services using Docker and prepare applications for different execution environments
- Troubleshoot integration issues, data consistency problems, and communication between distributed services
- Contribute to modernizing existing systems toward scalable and decoupled backend architectures

INOWU Development

Full Stack Developer

Dec 2023 – Nov 2025 | Hermosillo, Sonora, Mexico (Hybrid)

- Developed full-stack applications using React, Next.js, NestJS, and PostgreSQL
- Built and maintained responsive web applications and REST APIs
- Implemented features using TypeScript and modern frontend and backend architectures
- Developed solutions for national and international projects
- Solved complex technical problems while improving application performance, stability, and reliability
- Participated in modernization of existing systems, including legacy-to-web platform integration
- Implemented synchronization processes between Firebird-based legacy systems and cloud platforms using automated processes, database triggers, and backend services
- Managed and configured application infrastructure, including backend and frontend servers, databases, Redis, and email services

IGRTEC

React Native Team Lead

Sep 2023 – Dec 2024 | Remote

- Led a team of developers building cross-platform mobile applications using React Native
- Established software development best practices and code organization standards
- Performed code reviews and provided technical guidance to team members
- Implemented strategies to improve mobile application performance, stability, and maintainability
- Coordinated development workflows using Git and version control

Tecnológico Nacional de México, Campus Hermosillo - Bachelor's Degree in Software Development |

Aug 2017 – Dec 2024 | Hermosillo, Sonora, Mexico

Certifications

Microsoft: Software Development Fundamentals, Generative AI Fundamentals, Systems

Administration Career Fundamentals

DevTalles: TypeScript, React, React PRO, Zustand, TanStack Query, Shadcn/UI, Next.js, Node.js,

NestJS, Modern JavaScript, OpenAI & AI with React + NestJS, Git + GitHub
